

THE RIGHT CARE FOR YOUR GLASSES DURING CORONA TIMES!

- Do not clean glasses in domestic dishwashers.
- **Glasses and colors of SAHM resist temperatures of 70° C.**
- Use a special glass and disinfecting cleaning agent (must not contain caustic alkalis) and follow the manufacturer´s dosing recommendations.
- Allow warm glasses to cool down and do **not** shock or clean them with cold water below 15° C.
- Please also follow the manufacturer´s recommendations (both of the machine and of the washing agent)

Experts of the **Robert-Koch-Institute (RKI)** point out in their recommendations for hygiene measures that contaminated glasses and dishes can be cleaned as usual.

Furthermore a specialist of the **hygiene institute of Berlin** explained that a cleaning of glasses at 70° C combined with a disinfecting cleaning agent will destroy the Corona-Virus and germs.
